

# Phenylbute® Injection 20%

*Phenylbute® is a synthetic, non-hormonal, anti-inflammatory, antipyretic compound for the relief of equine inflammatory conditions associated with the musculoskeletal system.*

## Benefits:

- FDA approved.
- Administered IV.
- Response to phenylbutazone therapy is prompt, usually occurring within 24 hours.
- In animals, phenylbutazone is largely metabolized in 8 hours.

## Formulation & Packaging:

- 200 mg/mL phenylbutazone 100 mL vial

## Dosage:

- 5 to 10 mL per 1,000 lbs of body weight daily. Injection should be given slowly and with care. Limit intravenous administration to a maximum of 5 successive days, which may be followed by oral phenylbutazone dosage forms.
- See packaging for complete instructions.
