

**INDICATIONS:** For use in horses and ponies for correction of conditions associated with low circulating thyroid hormone (hypothyroidism).

**DOSAGE:** Doses should be individualized and animals should be monitored daily for clinical signs of hyperthyroidism or hypersensitivity. Suggested initial doses are 1–10 mg levothyroxine sodium (T4)/100 lb. body weight (2–20 mg/100 kg) once per day or in divided doses. Response to the administration of Thyrozine Powder should be evaluated clinically every week until an adequate maintenance dose is established. In most horses, this is usually in the range of 35 to 100 mg total daily dose of T4 (1–3 level tablespoons Thyrozine Powder).

Rev. 06-09

NDC 57319-455-27

# Thyrozine Powder

**A Palatable Supplement for the Correction of Conditions Associated with Hypothyroidism in Horses and Ponies.**
